EXEC'IA CONSULTING

5 questions worth more than a new AI project

Five questions to put to your leadership team before any AI investment.

AI is already rewriting the rules. The question is who still holds the pen. 5 min read.

HOW TO USE THIS GUIDE

1. Score yourself in five minutes: self-assessment on page 2.
2. Raise one question a week with your leadership team.
3. Launch the three "from Monday" actions for each question.

THE 5 QUESTIONS

01 Few executives know the real cost of strategic waiting

02 A significant portion of management time creates no strategic value

03 1 departure can erase 20 years of experience, without warning

04 Many lost clients had already sent weak signals

05 AI tools without governance: what if AI were already deciding for you?

Complimentary preliminary interview

30 minutes to understand your situation and assess together, how I can be of use to you.

EXEC'IA CONSULTING

SELF-ASSESSMENT

Where does your leadership team stand?

Score each question from 0 to 3. Five minutes is enough, alone or with your leadership team.

SCALE

0 Never discussed
1 Discussed, no decision
2 Decided, not yet managed
3 Managed and measured

READING YOUR SCORE

0 to 5 — LEVEL I · CLARIFY
Your AI decisions are waiting. Start by clarifying priorities.

6 to 10 — LEVEL II · DECIDE OVER TIME
The foundations are there. Now make the decisions last.

11 to 15 — LEVEL III · TRANSFORM
Your leadership team is already in control. Time to transform.

THE 5 QUESTIONS

		0	1	2	3
01	STRATEGIC DECISION-MAKING How much does a decision deferred for 90 days actually cost?	○	○	○	○
02	MANAGERIAL PRODUCTIVITY Do 20% of your managers' time truly create value?	○	○	○	○
03	EXECUTIVE KNOWLEDGE TRANSFER What part of your company would retire tomorrow?	○	○	○	○
04	CUSTOMER EXPERIENCE AND RETENTION At what exact moment do your clients start disengaging?	○	○	○	○
05	AI GOVERNANCE Who is really making the decisions in your organisation?	○	○	○	○

EXEC'IA CONSULTING

01

STRATEGIC DECISION-MAKING

How much does a decision deferred for 90 days actually cost?

KEY INSIGHT

Leaders fear making bad decisions.

They should fear even more the decisions that never get made. Every postponed choice freezes budget, delays revenue, slows teams and sometimes lets a competitor decide before you.

BOARD QUESTION

What important decision has been discussed for over three months without being made, and what is the real cost of that deferral?

IN PRACTICE, FROM MONDAY

1. List the AI decisions that have been pending for more than a quarter.
2. For each one, name an owner and a decision date.
3. Estimate, even roughly, what each month of waiting costs.

EXEC'IA CONVICTION

An imperfect decision creates momentum.
An absent decision creates stagnation.

LEVEL I · CLARIFY

€910 excl. VAT solo / €1,490 excl. VAT leadership team

02

MANAGERIAL PRODUCTIVITY

Do 20% of your managers' time truly create value?

KEY INSIGHT

Your most experienced people are absorbed by meetings, reporting, validations and information searches.

The issue is not wasted time. The issue is the value, decisions and opportunities that will never be created.

BOARD QUESTION

If you gave your top 5 managers one extra day per week, where would you invest that time?

IN PRACTICE, FROM MONDAY

1. Ask 5 managers to log their repetitive tasks for one week.
2. Pick the three that AI could assist.
3. Decide in advance what the time saved will be used for.

EXEC'IA CONVICTION

Productivity gains have no value until transformed into better decisions.

LEVEL I · CLARIFY

€910 excl. VAT solo / €1,490 excl. VAT leadership team

03

EXECUTIVE KNOWLEDGE TRANSFER

What part of your company would retire tomorrow?

KEY INSIGHT

A handful of experts may hold a decisive share of your company's critical knowledge.

That knowledge lives in no document. It lives in a few people's heads: shortcuts, judgments, intuitions. When they leave, certain decisions become slower, riskier or more costly. A leader feels the danger immediately.

BOARD QUESTION

If 3 people left tomorrow, which decisions would become impossible to make?

IN PRACTICE, FROM MONDAY

1. Identify the 3 people whose departure would block decisions.
2. Have them document their key trade-offs, not just their procedures.
3. Test an AI assistant built on these notes, under their control.

EXEC'IA CONVICTION

Knowledge transfer is not an HR matter.
It is a strategic continuity matter.

LEVEL II · DECIDE OVER TIME

€3,910 excl. VAT for the programme

04

CUSTOMER EXPERIENCE AND RETENTION

At what exact moment do your clients start disengaging?

IN PRACTICE, FROM MONDAY

1. Map the 3 moments when a client decides to stay or leave.
2. Define one weak signal to watch for each of them.
3. Let AI do the detecting, and a person do the responding.

LEVEL II · DECIDE OVER TIME

€3,910 excl. VAT for the programme

Discover the offer ›

KEY INSIGHT

Clients almost never leave abruptly.

They accumulate micro-disappointments, then make a silent decision. Most companies detect this decision several weeks too late, long after the lost client has moved on.

A lost client is not just lost revenue. It often represents years of trust, referrals and opportunities that will never return.

BOARD QUESTION

What are the 3 moments where a client decides to stay or leave, and are you observing them today?

EXEC'IA CONVICTION

One lost client is worth more than 100 leads.
What is not observed cannot be improved.

EXEC'IA CONSULTING

05

AI GOVERNANCE

Who is really making the decisions in your organisation?

KEY INSIGHT

Some decisions are made by tools. Others by habits. Others still by experts no one questions.

Many projects running in parallel, few truly strategic. The issue is not AI. The issue is control.

BOARD QUESTION

Which critical decisions should never be delegated, and which have already been, without your knowledge?

IN PRACTICE, FROM MONDAY

1. List the AI tools already in use, official or not.
2. Sort decisions: automate, assist, never delegate.
3. Name who approves each use, and against which criteria.

EXEC'IA CONVICTION

An organisation is well governed
when it knows why it decides: not just how.

LEVEL III · TRANSFORM

Quoted, from €6,910 excl. VAT

EXEC'IA CONSULTING

AI is already rewriting the rules.

The question is who still holds the pen.

> *Companies don't lack tools.*
> *They often lack clarity on the decisions that should never be delegated.*

Organisations that take these five questions seriously typically discover their main challenge is neither technological nor operational. It is strategic.

The question is not whether AI will transform your organisation. The question is whether your organisation will decide that transformation or be swept along by it.

THESE FIVE QUESTIONS ARE AT THE HEART OF OUR WORK

01 AI investment prioritisation

02 Managerial productivity and time savings

03 Critical knowledge transfer

04 Customer experience and retention

05 AI governance

30 minutes to step back on the decisions that matter.
